

# Leandro Javier Borsini

Jr. Python Developer

---

## EXPERIENCE

### Photo-Viewer: Python

February 2023

Using Python and its libraries I developed a friendly and simple photo viewer where you can add any photo from your device.

### CRM: Python, SQLite

February 2023

I made a customer manager .exe with an integrated database and Tkinter for UI, where I learned the use of TreeView to display information as a table.

### To Do List: Python, Flask, HTML, CSS, MySQL

January 2023

Overcoming the challenge of integrating MySQL with Flask, I developed a web application which you can manage your tasks to perform, also admitting the differentiation between different users.

### Mailer: Python, Flask, HTML, CSS, API Sengrid

January 2023

I learned about the implementation of external APIs having developed a web page that allows sending emails to different destinations.

## EDUCATION

### Hola Mundo Academia – Programming Flask

- Python, Flask, HTML, CSS, Mysql

### Cisco Networking Academy – Programming Python

- November 2022 – PCAP Certificate
- August 2022 – PCEP-30-02 Certificat

## LANGUAGES

- Spanish
- English
